

# GRUPE RENAULT

## The Dacia plant has manufactured 1,000,000 cars on the X90 platform

A 1.6 MPI Gris platine Logan Préférence was the 1,000,000th car manufactured on the X90 platform at Dacia's Mioveni Plant. The anniversary model rolled off Dacia's assembly line on Thursday, the 3rd of September 2009, during the 1st shift.

The model range developed on the X90 platform has made significant and constant progress during the last five years of production at the Mioveni Assembly Plant. The five models of the Logan range are currently available in 27 different versions.

The Dacia Assembly plant manufactures 1,340 cars /day, with over 85% of the output volumes being exported.

The models of the X90 platform are also being manufactured in the Somaca plant in Morocco as Dacia vehicles, and in other seven assembly plants badges as Renault vehicles, in Russia, Columbia, India, Iran (2 plants), Brazil, and South Africa.
